

## Terms of service

### LUCKEE T&C.

LUCKEE is an online community offering social games, crypto-enabled payment, hardware gamification, and event contracts.

Every service offered by Luckee is either automated or quasi-automated as outcomes are decided by an independent algorithm.

This product is meant to serve individuals who are 18+ years of age or individuals within the legal age stipulated by their geographic law. All our services can be accessed by visiting the [www.luckee.ng](http://www.luckee.ng) website.

“**Luckee**” offers every participant, an equal opportunity to choose from seven (7) categories of expertise and personal knowledge:

- **Digital Quick Draw** – Participants are randomly matched and paired with other real-time participants across the globe, and winners are decided randomly by an independent selection algorithm. The house has zero influence on who emerges as the winner of the draw.
- **Factoes** – Users are allowed to trade and wager on listed topics of interest prior to the verification date and time or before the outcome holds true. Topics are categorized as either **facts** or **opinions**. Topics are published on the site after proper vetting for flaws or bias by our risk managers. The house has zero influence on how outcomes play out.
- **Numbers** – Participants are allowed to choose from a range of 1–80. At least one (1) number can be chosen and a maximum of four (4) numbers combined. Winners are made when participants' prediction tallies (matches) with **any of** the house published numbers, either by a **single number or via combination**.

- **Pacesetter** – Participants are allowed to answer random quiz questions from a variety of fields within a fixed timeframe. This game is simply a test of the participant's knowledge and versatility. Winners are automatically determined by our independent algorithm, which keeps track of and records participants' performances.

Performance here is measured by the number of questions correctly answered within the fixed time by each participant. The topmost rank on the scoreboard is selected as the winner by our algorithm at the closure of each session. The session's duration is subjected to change. Users will be updated beforehand before effecting an extension or a reduction in session duration.

- **Shopping Spree** – Participants can play to win a different amount of money pegged to a shopping voucher. A voucher can be converted into items at partnered malls. Winners are randomly selected by an independent algorithm. The house has zero influence on who emerges as the winner of the draw. Vouchers are meant to be spent before expiration. The expiration date is clearly stated on the voucher.
- **Cash-prize** – Participants can play to win different amounts of money. Winners are randomly selected by an independent algorithm. The house has zero influence on who emerges as the winner of the draw. Cash prizes may be paid in instalments or in a lump sum. It depends on the winner's arrangement with the company.
- **Wishlist** – Participants can choose what they want from the available options. A fixed number of winners are drawn at random automatically at the closure of each season. The house has zero influence on who emerges as the winner.

The participation in the categories stated above will run through a Luckee Web and App platform created for this purpose. Participants are advised to thoroughly go through the terms and conditions of use before using this platform.
